

Health Care Reform Can't Wait

CALL CONGRESS TODAY!

The U.S. Senate is still trying to decide if it will support health care reform that works for working families, but the U.S. House has already put together a historic health care reform bill that working families can support.

H.R. 3962 takes great strides towards providing health coverage for all Americans, controlling costs, and reducing the deficit.

✓Improves Your Current Coverage.

H.R. 3962 will end insurance company abuse by not letting them deny coverage because of pre-existing conditions or cancel coverage and raise premiums because you get sick.

✓Expands Choices With a Strong Public Option.

The bill includes a public health insurance option to offer more choices to working families, lower costs for all and keep insurance companies honest through competition.

✓Makes Health Care Affordable.

H.R. 3962 includes affordability credits and out-of-pocket spending caps to make health care more affordable for everyone.

✓Requires Shared Responsibility.

The bill makes sure employers pay their fair share by either providing health care for employees or paying into a common fund so responsible employers don't have to pick up the tab for freeloaders.

✓No New Taxes on Working Families.

H.R. 3962 does not hurt working families by taxing middle-class health benefits.

Here is what you can say when you call:

"Hello, my name is _____. I'd like to speak to Congress member _____'s key health care staffer. I'm calling because I support the right for every person to have access to the health care they need. I'm asking Congress member _____ to support real health care reform that puts regular people before insurance company dollars and to enact the strong reforms outlined in the House bill. We need reform that guarantees affordable care for everyone and ask for your support."

Add your voice to the health care debate.
