

DEMAND THE CHOICE OF A PUBLIC HEALTH OPTION

**Nearly 3 out of 4 voters want a public health insurance option.
It is the only way to control costs, ensure quality, and force
private insurance companies to finally put our health before
their profits.**

We cannot fix our economy without fixing our health care system. But we need a system that finally gives us the quality, affordable health coverage we need and no longer leaves us at the mercy of the private insurance industry.

We need the choice of a public health insurance plan so we:

- ✓ have a guaranteed backup that will be there no matter what happens.
- ✓ have a guarantee of standard, comprehensive benefits that meet our needs.
- ✓ can afford health insurance based on our ability to pay.
- ✓ no longer have to watch our hard-earned money go to paying high CEO salaries and corporate profits.

We also need government to act as a watchdog, setting and enforcing rules so private insurance companies can't keep charging whatever they want and dropping coverage when we need it most.
