

SAFeway Wants to Kill

Affordable Health Care

for OUR Families

Safeway and its CEO Steve Burd have forced tens of thousands of Southern California working families into the streets in a fight to save affordable health care at work.

The Safeway agenda is simple: eliminate affordable health care benefits for its workers.

Safeway doesn't have to do this. Profits have gone up 82% to \$3.1 billion over the past five years.

If we let giant, profitable corporations get away with this – then every worker is at risk of losing health benefits at work.

Working families have no fat in their budget. They have no extra. Without health benefits, any illness could mean financial disaster.

This is a fight between corporate greed vs. human need.

WE ARE HOLDING THE LINE FOR AMERICA'S HEALTH CARE

You Can Help.
