

We're your friends and your neighbors.

We're sorry for the inconvenience...

...but we couldn't let corporate greed take away our families' health care benefits.

Here are the facts...

- Vons (Safeway), Ralph's (Kroger), and Albertsons combined profits are **91% higher than four years ago.**
- Corporate **profits have risen 10 times faster** than the employers' contribution for worker health benefits over the past ten years.
- They say they only want us to pay \$5 to \$15 per week for our health coverage--but under their proposal, **our benefits would be cut 50%.** New hires would effectively not have any real health care protection at all.

If corporate greed wins, all of Southern California loses. These companies would drain over \$700 million a year from this area--when they cut health care for workers, they rip off California.

Help us beat corporate greed. Please support our strike.
