

SAFEWAY Wants to Kill

Affordable Health Care for OUR Families

Safeway and its CEO Steve Burd have forced tens of thousands of Southern California working families into the streets in a fight to save affordable health care at work.

This fight is not about a \$5 to \$15 dollar premium co-pay. **Safeway wants to effectively eliminate affordable health care benefits for its workers.** New workers wouldn't have any real benefits at all. Current workers would face \$95 a week premium co-pays or mass cuts in benefits.

Safeway just doesn't tell the truth.

Safeway doesn't have to do this. Profits have gone up 82% to \$3.1 billion over the past five years.

If we let giant, profitable corporations get away with this – then every worker is at risk of losing health benefits at work.
